

MOHD ARSALAN

FULLSTACK DEVELOPER

+91 6307764094 | arsalanloq@gmail.com | [GitHub](#) | [LinkedIn](#) | Bareilly, Uttar Pradesh

SUMMARY

Full Stack Engineer specializing in **scalable backend systems** and **AI-powered applications**. Delivered 100+ production REST APIs, resolved critical production issues, and developed automation workflows leveraging modern AI frameworks. Strong expertise in **Node.js**, **TypeScript**, **Prisma**, **PostgreSQL**, and **Docker**.

TECH STACK

Languages: TypeScript, JavaScript, Java, Python, SQL, HTML/CSS

Frontend: React.js, Next.js, Zustand, Redux, Tailwind CSS

Backend: Node.js, Express.js, Nest.js, REST API Design, JWT, OAuth, Zod, MVC Architecture

Databases & ORM: PostgreSQL, MySQL, MongoDB, Prisma ORM

Caching & Messaging: Redis, BullMQ, Socket.IO

AI & Automation: OpenAI API, Gemini API, Groq API, Prompt Engineering, LangChain, LangGraph, RAG Systems

DevOps & Cloud: Docker, Railway, Vercel, Render, GitHub Actions, CI/CD, Nginx

Logging & Observability: Winston, structured logging (PII-safe)

EXPERIENCE

MAT Nite Pvt. Ltd.

Full Stack Engineer

Remote

Apr 2026 – Present

- Architected the Online Examination Management System, delivering **42 RESTful APIs** across **9 modules** on an **11-table PostgreSQL schema** using Node.js, Express, and Prisma ORM.
- Built a **query-driven** result engine that computes scores and pass/fail statistics directly from attempt data, eliminating a redundant results table.
- Fixed a critical JWT vulnerability caused by incorrect refresh-token signing and missing user roles, preventing an admin-auth bypass; also resolved **13 TypeScript build errors** and a bcrypt hash leak.
- Developed a React (Vite) + Zustand frontend with Axios auto-refresh interceptors and integrated Brevo Email API for OTP-based registration and automated result delivery.

PROJECTS

CampusConnect – Social Media & Marketplace Platform [Repo](#)

July 2026 – Present

- Architected a **6-service microservices backend** with a dedicated **API Gateway**, using database-per-service isolation across PostgreSQL/Prisma and MongoDB/Mongoose, containerized via **Docker Compose**.
- Designed and exposed **60+ REST API endpoints** across **14 database models**, spanning authentication, marketplace, social feed, announcements, chat, and notification domains.
- Engineered event-driven, asynchronous processing with **BullMQ queues** and **background workers**, using **Redis Pub/Sub** to power **real-time Socket.io events** for live chat and notifications.
- Tech Stack: *React 19, Express 5, MongoDB, PostgreSQL, BullMQ, Scket.IO. Redis, Docker.*

HireHub – AI-Powered Job Portal [Live](#)

Jan 2026 – April 2026

- Integrated **LLaMA 3.3 (70B)** via Groq API for AI-powered resume parsing and developed **65+ production REST APIs**.
- Resolved **10+ backend security vulnerabilities**, including plaintext password logging, admin-auth bypass, and MongoDB indexing issues..
- Deployed services with Docker Compose on Railway, replaced **pdfjs-dist** with **pdf-parse** for container compatibility, and configured separate SSR and browser API endpoints.
- Tech Stack: *Next.js 16, React 19, Express 5, MongoDB, Groq API, Docker.*

Shopnosis – E-Commerce Platform [Live](#)

Oct 2025 – Nov 2025

- Integrated the PayPal payment gateway with a complete checkout flow and Redux-managed cart state, delivering **30+ production REST APIs**.
- Deployed the production application on Vercel using automated GitHub CI/CD pipelines.
- Tech Stack: *MERN, Redux, PayPal API.*

EDUCATION

Future Institute of Engineering and Technology

Bachelor of Technology in Computer Science

Bareilly, India

2023 – 2027
